Allowable Subject Matter

1. Claims 1, 6-20, 22 are allowable over the prior art of records.
2. The following is an Examiner's statement of reasons for the indication of allowable subject matter: Claims 1 and 12 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts which teach a method of regulating usage in a smart card system comprising the steps of determining if the smart card was previously disabled; checking the identification code against a list stored locally at the card presence location if the identification code of the smart card is listed on the list, enabling the smart card wherein enabling comprising at least one of the steps of changing the status data in the smart card to indicate enabled and unblocking an area of memory located within the smart card (claim 1); the steps of: compiling a first list of smart cards; transmitting the first list to a set of card acceptance locations, wherein the first list is stored locally at each card acceptance location in the set; receiving a second list of smart cards from each card acceptance location in the set, wherein the card acceptance location has performed an action on each smart card listed on its respective second list; if the smart card is listed on the second list and the first list, purging the smart card from the first list; and if the smart card is listed on the second list but is not listed on the first list, adding the smart card to the first list (claim 12).

The remaining claims, not specifically mentioned, are allowed for the same rationale as set for their dependent claims.
